

Quality & Productivity Specialist

QUALITY ASSURANCE

Far East Machinery uses standardized manufacturing and quality control procedures tailored to the specific characteristics of each Horizontal Boring Mill model in order to maximize precision and reliability. Our Quality Assurance Specialists use the latest in inspection technology and software for optimum quality assurance.

All machines manufactured by Far East Machinery are built according to established international quality standards.

All Horizontal Boring Mills are QA inspected with the finest of precision instruments before shipment to ensure the machines' accuracy and performance.

All machines manufactured by Far East Machinery conform with ISO 9001 international quality standards.

All machines manufactured by Far East Machinery confirm the international testing standards.

X Axis Travel(mm)

Table Loading(kgs)

BMC-R Series Features

- 1 All primary structural components are composed of high quality cast iron
- 2 Fixed column construction
- 3 Controlled 5 Axis (X,Y,Z,W,B), 4 Axis Simultaneous
- 4 Maximum table size 1440mm X 1600mm
- 5 B-Axis design integrates two worm gears to minimize backlash; incorporates high precision encoder (rotary scale) for 0.001 degree precision table rotation
- 6 X-Axis Maximum Travel to: 3000mm
Y-Axis Maximum Travel to: 1780mm
Z-Axis Maximum Travel to: 1650mm
- 7 W-Axis: 500mm (BMC-110series)
- 8 X, Y, Z Axis Linear Scales (Standard)
- 9 Spindle constructed of wear resistant, high tensile strength alloy steel with a Hardness of more than HV1000
- 10 Spindle Max. Speed: 2500 RPM (3000 RPM Option)
- 11 Spindle Max. Torque: 1504Nm (2792Nm 30/37 kW Spindle Motor Option)
- 12 FANUC Control Standard (Heidenhain, Siemens Option)
- 13 Table Load Max. Capacity to: 6,300 Kgs
- 14 Optional Spindle Extension Sleeve for increased rigidity with extended W-Axis

Fixed column construction. High precision.
High efficiency

BMC-R Series

FEMCO BMC Series

BMC-110R2/R3

BMC-T Series

FEMCO BMC Series

Traveling Column Design
High Table Load Capacity

BMC-T series Features

1	All primary structural components are composed of high quality cast iron
2	Traveling Column Design, High Table Load Capacity, Rigid Construction
3	Controlled 5 Axis (X,Y,Z,W,B), 4 Axis Simultaneous
4	Maximum table size 1440mm X 1600mm
5	B-Axis design integrates two worm gears to minimize backlash; incorporates high precision encoder (rotary scale) for 0.001 degree precision table rotation
6	X-Axis Maximum Travel to: 4000mm Y-Axis Maximum Travel to: 2050mm Z-Axis Maximum Travel to: 1500mm
7	W-Axis Travel: 500mm (BMC-110series)
8	X, Y, Z Axis Linear Scales (Standard)
9	Spindle constructed of wear resistant, high tensile strength alloy steel with a Hardness of more than HV1000
10	Spindle Max. Speed: 2500 RPM (3000 RPM Option)
11	Spindle Max. Torque: 1504Nm (2792Nm 30/37 kW Spindle Motor Option)
12	FANUC Control Standard (Heidenhain, Siemens Option)
13	Table Load Max. Capacity to: 8,000 Kgs
14	Optional Spindle Extension Sleeve for increased rigidity with extended W-Axis

BMC-110T2/T3/T4

BMC-135TN

Spindle up to 3,000rpm and higher torque capability. It develops for aerospace composite materials, automotive body and other complex work-piece from the higher performance of accuracy and stability.

Suitable for large workpieces
heavy boring and milling

Available on all models with 110mm Spindle Bar Dia.

FT TYPE Column-Moving Special features

Use for corner machining, internal/external taper machining, ID/OD grooving and facing on valve body, pump housing, fitting and turbine housing.

6 axis (X、Y、Z、W、B、U) independent NC
which is programmable for all shapes of workpiece.

HSK-100
standard

standard

-  Outer OD (taper、sphere、contour)
-  End-Face (chamfer、groove)
-  ID (taper、sphere、shape)
-  Grooving (ID, OD groove)
-  Threading (ID, OD thread)

ISO-50

-  Facing Milling
-  Boring
-  Tapping
-  Tapping
-  End-Mill
-  Milling & Grooving

Ø125mm ~ Ø250mm, suitable for Spindle 110mm model (REMARK)

Unique Facing Tools designed for use with Automatic Tool Changer and to be stationed in ATC Magazine for flexible part processing

Tool Type Facing Heads of various sizes are an exclusive FEMCO patented design.

FEMCO offers 4 different Facing Head sizes with U-Axis for machining various bore features. These Facing Heads suitable for machining smaller diameters allow the use of the ATC for increased machining efficiency.

*TOOL TYPE FACING HEAD IS NOT SUITABLE FOR STANDARD SPINDLE.

BMC-250T

High Speed Horizontal Boring Mill
for deep cavity mold machining

BMC-100HT

Traveling Column Design
High Table Load Capacity

Available for BMC-110R1, table size 1100X1100mm (remark)

Automatic Pallet Changer (APC) for optimum efficiency. Operator can load and unload workpiece(s) on one pallet, while machining operations are in progress on second pallet thus eliminating load and unload times

Fixed Long Nose Spindle design provides rigidity for mold cavity machining at **8000rpm**

Guarding

Working Table Splash Guard

Full Splash Guard
(Without Roof)

CE Safety Fence

Full Splash Guard
(With Roof)

*APC SYSTEM IS AVAILABLE FOR DIFFERENT MODEL, PLEASE CHECK WITH PRODUCER FOR MORE INFO
